

Year 4: Maths Knowledge Mat

Counting from 0

Counting in **multiples of 6**
0, 6, 12, 18, 24, 30, 36, 42 ...

Counting in **multiples of 7**
0, 7, 14, 21, 28, 35, 42, 49...

Counting in **multiples of 9**
0, 9, 18, 27, 36, 45, 54, 63 ...

Counting in **multiples of 25**
0, 25, 50, 75, 100, 125, 150...

Counting in **multiples of 1000**
0, 1000, 2000, 3000, 4000...

Counting up and down in **hundredths**

$\frac{1}{100}, \frac{2}{100}, \frac{3}{100}, \frac{4}{100} \dots \dots \frac{99}{100}, 1$

A **thousand more** than 4753 is 5753.

A **thousand less** than 4753 is 3753.

Rounding

The number in the middle is half way and **ROUNDS UP** to 40

Rounding to 100 and 1000 follows the same rule.

350 rounds up to 400
3500 rounds up to 4000

Rounding decimal places also follows the same rule.

3.4 rounds to 3.0 but 3.5 rounds to 4.0
3.04 rounds to 3.00 but 3.05 rounds to 3.10

Negative Numbers

Multiplication Tables (and 2x,3x,4x,5x,8x,10x from previous years)

x	6	7	9	11	12
1	6	7	9	11	12
2	12	14	18	22	24
3	18	21	27	33	36
4	24	28	36	44	48
5	30	35	45	55	60
6	36	42	54	66	72
7	42	49	63	77	84
8	48	56	72	88	96
9	54	63	81	99	108
10	60	70	90	110	120
11	66	77	99	121	132
12	72	84	108	132	144

Roman Numerals

1 = I	10 = X
2 = II	20 = XX
3 = III	30 = XXX
4 = IV	40 = XL
5 = V	50 = L
6 = VI	60 = LX
7 = VII	70 = LXX
8 = VIII	80 = LXXX
9 = IX	90 = XC
	100 = C

Factors

A **factor pair** is a pair of numbers that, when multiplied will result in a given product.

Factor pairs of 16 are
1, 16
2, 8
4, 4

Formal methods of short multiplication and division

351 x 7 becomes

$$\begin{array}{r} 351 \\ \times 7 \\ \hline 2137 \end{array}$$

91 ÷ 7 becomes

$$\begin{array}{r} 13 \\ 7 \overline{) 91} \\ \underline{7} \\ 21 \\ \underline{21} \\ 0 \end{array}$$

Year 4: Maths Knowledge Mat

Time – Sticky Knowledge

Digital and analogue clocks

Both clocks show it is 10 o'clock. But only the digital clock shows that it is pm (in the evening) because it is using 24 hour time.

2D Shapes

Rhombus

All four sides are the same length, like a square that has been squashed sideways.

Trapezium (or trapezoid)

Two sides are parallel. Side lengths and angles are not equal.

Symmetry

1 line of symmetry

3 lines of symmetry

4 lines of symmetry

Infinite number of lines of symmetry

Simplifying fractions

$$\frac{40}{80} = \frac{20}{40} = \frac{10}{20} = \frac{5}{10} = \frac{1}{2} \quad \text{So } \frac{40}{80} = 0.5$$

Area

The area of this shape → EQUALS → the area of these two

$$\begin{aligned} \text{The area of this shape} &= (6 \times 6) + (2 \times 3) \\ &= 36 + 6 \\ &= 42 \text{ cm}^2 \end{aligned}$$

Place value

Each row divides by 10

Place value Each row divides by 10	Tens	Ones	•	tenths	hundredths
45	4	5	•	0	0
$4.5 = 4\frac{5}{10} = 4\frac{1}{2}$	0	4	•	5	0
$0.45 = \frac{45}{100}$	0	0	•	4	5

Coordinates

X axis comes first, so

A = (0,2)
B = (1,0)
C = (2,4)
D = (5,5)
E = (4,2)

This shape has been **translated** up and left by -3, -3. (Taken away from each co-ordinate.)

Triangles

Equilateral Triangle

Right Triangle

Isosceles Triangle

Scalene Triangle

Acute Triangle

Obtuse Triangle
